## Capsul PB4000 Printer Wi-Fi Setup Guide

- 1. Find the Capsul PB4000's AP-Mode SSID
  - a. From the control panel, hit the  $\mathbf{OK}$  button

- b. Use the arrow buttons to highlight Information and press OK
- c. Use the down arrow to highlight **AP SSID** and press **OK**
- d. Make note of the AP SSID. It will look like PRT-54187A.

## 2. Connect your Mobile Phone

(or other Wi-Fi-enabled device like a laptop computer or tablet)

- a. On your mobile phone go to **Settings** > **Wi-Fi** and connect to the Capsul PB4000's SSID, which you found in Step 1. You may receive a message that the network has no internet connection, that is expected.
- b. Open a web browser on your mobile phone such as Safari, Chrome, or Edge.
- c. Enter **192.168.200.1** in the address field and hit **Go.** This will load the Capsul PB4000's Wi-Fi setup page.

3. Use the Capsul PB4000's web page to connect the printer to your Wi-Fi network a. On the PB4000's web setup page, select Network and then Wi-Fi Settings

b. Click on the Search AP link to search for available networks

n Settings	Copy Settings		ID Card Settings	Scan Settings	Properties
1475 E	i Sottingo				
VVI-F	1 Settings				
Action:	Search AP	I	IP Setting		

Continue to the next page

c. Select the network that you would like to connect the printer to

	Search AP		P Setting			
uti c	BCI-E40F	1				
ull S	howroom					
ull G	Suest					
	ffice					
	Varehouse					

d. Enter the password for the Wi-Fi network and select Connect

## Wi-Fi Settings

Action:	Search A	P		IP Setting			
itte s	CBCI-E40F						
e ett	Showroom						
<b>ال</b> د <u>8</u>	Guest						
8 at 1	Office						-
Pa	ssword					Connect	
8 at 1	Warehouse						
i al	Guestouse						

e. You will see a message to let you know that the wired network will be disabled, that is normal.

- f. After a few seconds you will see the IP address for the printer appear on the screen.
- g. Once the printer is connected remember to switch your phone back to your regular Wi-Fi network for internet access
